## *To the Reader.*

**C**ourteous Reader in this my Almanake,  
thou hast eight Coloms, the first and se-  
cond toward the left hand, shew the day of the  
month and weeke, with the Sunday Letter; the  
third sheweth the Saints dayes that change not;  
the fourth sheweth the Sigae wherein the  
Moone is euery day; the fift sheweth the moue-  
able feasts, as Shroftide, Easter, and Whitsun-  
day: also the beginning and ending of the  
Terme, with the retorne dayes, and the foure  
Embers, as also the Aspects of the Planets, and  
in the three last Coloms toward the right hand  
the forraine accompt, much seruing those that  
haue any cōmerce with Marchants beyond the  
Sea, and in my Prognostication; A brieft and  
pithy Chronologie (somewhat augmented) of  
many things worthy to bee remembred since  
the Creation, and also some other Tables both  
vsefull and delightfull, wherein I haue laboured  
for to giue content, which if I haue done. I haue  
my wish, thus crauing thy fauourable excep-  
tance, I rest thine euer

A Description of the foure quarters of the  
yeere. And first of Winter quarter.

☉. in ♊. 22. ♋.

**A**ccording to the custome of Writers in this kinde,  
Winter quarter is the first quarter, which tooke be-  
ginning the 1 day of December 1625. at what time  
the Sun entred into the first minute of the earthy, cold and  
dry signe of Capricorne; beginning then most remote from  
vs in his furthest South declination, causin<sup>g</sup> with vs the  
shortest day and longest night in the yeere; which quarter  
continueth vntill the same hath slowly passed through the  
three cold, airy, earthy and watery signes ♊. 22. ♋.

This Quarter doth naturally resemble old age, as bring-  
ing many vnto youth.

The Diseases incident vnto this Quarter, are Fevers,  
Coughs, Cathars, Rheumes, obstructions of the Lungs,  
Hoarsnesse, and such like diseases proceeding of cold and  
moist causes, &c.

Of the Second part of the yeere called the Spring.

☉. in ♈. 11.

**T**his Quarter doth take his beginning the 10 day of  
March, at what time the Sun doth enter into the first  
minute of the hot and dry signe ♈, which will be vpon  
the 10 day of March, and doth continue whilst the Sun is  
making his passage through these 3 Aernall signes, ♈. 11.  
and ♉.

This Quarter is naturally hot and moist, and doth re-  
semble growing youth. The diseases incident vnto this  
Quarter are Small-pox, Measels, Scabs, and such like, &c.

Of the third Quarter called Summer.

☉. in ♋. 22. ♌.

**T**he Summer Quarter doth take his beginning  
when the Sunne doth enter into the first Degree of  
Cancer; which will be vpon the 11 day of June, and  
doth continue whilst the Sunne passeth through Can-

## A Prognostication.

er, Leo, and Virgo : Now are the daies longest and aire hottest ; but for necessity b<sup>e</sup> Physick adue. The Diseases incident this Quarter, are Frenlies, Burning feuers, Cauterures, Jaundies, and such like ; from which good Lord deliuer vs.

Of the fourth Quarter called Autumne  
or Haruest.

☉. in ♎. m. 7.

**A**utumne or Haruest (commonly called the fall of the leafe) doth beginne, when the Sun doth enter into the first Degree of Libra, making againe the day and the night of equall length, which will bee vpon the 13 of September, and doth continue whilst the Sunne doth passe thorow Libra, Scorpio, and Sagittary ; which is from the 13 of September, vnto the 12 of December : this is the most dangerous and vnhollsome Quarter in the yeere. The diseases incident this Quarter are many and dangerous, as the Spleene, Fluxes of blood, Stopping of Urine, Tympanies, the Stone, grieke in the Backe, and many other : from which let vs all pray vnto Almighty God to be deliuered.

Of Eclipses happening this yeere 1626.

This yeere the 28 of July about 7 of the clocke in the evening, the Moone being in ♋. and neere vnto the Dragons tayle, the ☉ in Leo, the Moone for the space of an houre and something moze will suffer a small Eclipse.

## The vse of the foresaid Table.

**F**irst having a walking staffe deuided into 12 equall parts (bec the staffe of what length it will being equally deu- ded) where with walking, if you desire the howre of the day, if the Sunne shine, set your staffe vpright, and how many of those parts there are in the length of the shadow, then looke in the Table, knowing what month and day of the month it is, which day, if you finde not in the Table then take the day that is nearest vnto the day you seeke for either before the day or after the day, and looke in the beginning of the Table and you shall finde the howre, either before noone or after noone as the Table sheweth, for the Sunne hath like altitude at like distance from the Meridian line in the forenoone ascending, and in the afternoone descending.

### *Example.*

Walking abroad the 22 of Nouember, when the Sunne is in 10 degree of Sagitari. I would know what time of the day it is, I set my staffe vpright, and I finde the shadow to containe 57 of those parts that is the length of my staffe 4 times and 9 parts of the 12 whereby I perceiue that it is either 10 in the forenoone or else 2 in the afternoone, and so of the rest as the Table sheweth.
